

AHK Academy — Pages & Screens for Frontend Design

Total: 52 pages across 5 portals. Each page lists what data it shows and which API it calls.

Portal Overview

Portal	URL Prefix	Role	Pages
Public	/	None	5
Admin	/admin	ADMIN	14
Teacher	/teacher	TEACHER	13
Student	/student	STUDENT	12
Onboarding	/onboarding	Any logged-in	2

1. Public Pages (No Login Required)

Landing Page — /

- Hero section, features, pricing, CTA buttons
- No API calls needed (static)

Login — /login

- Email + password form
- API: POST /api/auth/[...nextauth] (credentials provider)

Blog Listing — /blog

- Grid of published posts with title, excerpt, date, language badge
- API: GET /api/blog (public)

Blog Post — /blog/[slug]

- Full article with rendered markdown, author, reading time, keywords
- API: GET /api/blog?slug=xxx or server-side Prisma query

AI Chatbots — /chat, /chat/english-tutor, /chat/homework, /chat/sales

- Chat UI with message bubbles, input field
- API: POST /api/chat with { message, chatType }

2. Admin Portal (/admin)

Dashboard — /admin

- Stats cards: Total Students, Active Teachers, Revenue, Sessions This Week
- Recent activity feed
- Quick actions

Students — /admin/students

- Table: Name, Email, Level, Track, Status, Last Active
- Add Student form (modal/drawer)
- API: GET /api/students, POST /api/students

Student Detail — /admin/students/[id]

- Profile info, enrollment history, payment status, progress charts
- API: GET /api/students/[id]

Teachers — /admin/teachers

- Table: Name, Email, Specializations, Active Students
- Add Teacher form
- API: GET /api/teachers, POST /api/teachers

Classes — /admin/classes

- Table: Class name, Teacher, Students count, Schedule
- Create Class form
- API: GET /api/classes, POST /api/classes

Speaking Sessions — /admin/speaking

- Table: Date, Topic, Students, Status (Scheduled/Completed/Cancelled)
- Filters: date range, status
- API: GET /api/speaking-sessions

Speaking Session Detail — /admin/speaking/[id]

- Session info, participant list, transcript viewer, AI analysis results

- Actions: add participant, upload transcript, trigger analysis
- API: GET /api/speaking-sessions/[id], POST ../participants, POST ../transcript, POST ../analyze

Create Speaking Session — /admin/speaking/create

- Form: date, topic, duration, meeting link
- Student picker with smart suggestions
- API: POST /api/speaking-sessions, POST /api/sessions/suggest-students

Topics — /admin/topics

- Table: Topic name, Category, Difficulty, Times Used
- Create/Edit topic form
- API: GET /api/topics, POST /api/topics

Groups — /admin/groups

- Group management for speaking sessions
- Chemistry scores between students
- API: GET /api/sessions/suggest-students

Grammar — /admin/grammar

- Stats: Categories, Topics, Exercises, Student Completion
- Overview of grammar system content

Payments — /admin/payments

- Stats: Total Revenue, Pending, This Month, Active Plans
- Payment Plans table: Student, Type, Amount, Next Due
- Transactions table: Student, Amount, Method, Status, Date
- Actions: Create Plan, Record Transaction, Confirm IBAN Payment
- API: GET/POST /api/payments/plans, GET/POST /api/payments/transactions, POST /api/payments/confirm

WhatsApp — /admin/whatsapp

- Stats: Total Conversations, Active Leads, Student Chats, Unread
- Conversation list with phone, type badge, last message preview
- Quick send form
- API: GET /api/whatsapp/conversations, POST /api/whatsapp/send

WhatsApp Conversation — /admin/whatsapp/[id]

- Chat bubble UI (inbound left, outbound right)
- Message history with timestamps
- User info sidebar
- Reply input
- API: GET /api/whatsapp/conversations/[id], POST /api/whatsapp/send

Blog Management — /admin/blog

- Stats: Total Posts, Published, Drafts
- Posts table: Title, Language, Status, Date
- Create Post form + AI Generate button
- API: GET /api/blog, POST /api/blog, POST /api/blog/generate

Analytics — /admin/analytics

- Platform-wide stats: Students, Teachers, Sessions, Revenue
- Revenue by method (IBAN/Papara/Stripe pie chart)
- Student growth (active vs inactive)
- Country distribution (bar chart)
- Level distribution (A1-C2 bar chart)
- Top performing students

3. Teacher Portal (/teacher)

Dashboard — /teacher

- My stats: Active Students, This Week Sessions, Pending Homework
- Upcoming sessions list
- Recent student activity

My Students — /teacher/students

- Table: Name, Level, Track, Last Session, Grammar Progress
- API: GET /api/teacher/students

Classes — /teacher/classes

- Teacher's assigned classes with student lists
- API: GET /api/teacher/classes

Lessons — /teacher/lessons

- Lesson log with dates, topics covered
- Create lesson form

- API: GET /api/lessons, POST /api/lessons

Assignments — /teacher/assignments

- Assignment list with submission status
- Create assignment form
- API: GET /api/assignments, POST /api/assignments

Speaking Sessions — /teacher/speaking

- Teacher's session list (upcoming + past)
- Status badges, quick actions
- API: GET /api/teacher/speaking

Speaking Session Detail — /teacher/speaking/[id]

- Full session management: attendance, transcript, analysis, homework
- Per-student analysis cards with scores
- API: Multiple endpoints under /api/teacher/speaking/[id]/...

Create Session from Lesson — /teacher/speaking/create

- Create session linked to a lesson topic
- Student suggestions based on who needs this topic
- API: POST /api/speaking-sessions, POST /api/sessions/suggest-students

Topics — /teacher/topics

- Topic bank management
- Create custom topics based on lessons
- API: GET/POST /api/teacher/topics

AI Insights — /teacher/insights

- AI-generated insights about student progress trends
- Mark as read
- API: GET /api/teacher-insights, POST /api/teacher/insights/mark-read

Grammar Overview 📖 /teacher/grammar

- View student grammar progress across categories
- Assign grammar topics to students
- API: GET /api/grammar/progress, POST /api/grammar/assignments

Payments — /teacher/payments

- Revenue overview: This Month, Total, Students Paid/Pending
- Transaction history
- API: Server-side Prisma query (teacher's students' payments)

Analytics — /teacher/analytics

- Stats: Total Students, Sessions This Month, Avg Score, Resources Generated
- Student progress table (level, sessions, participation, grammar, homework)
- "Students at Risk" section
- "Generate Weekly Resources" button
- API: POST /api/teacher-resources/generate

Attendance — /teacher/attendance

- Attendance tracking for classes
- API: GET/POST /api/attendance

4. Student Portal (/student)

Dashboard — /student

- My stats: Level, Sessions Attended, Grammar Progress, Next Session
- Upcoming sessions with topics
- Recent homework

Speaking Sessions — /student/speaking

- Upcoming sessions (with prep topic shown)
- Past sessions with scores
- API: GET /api/speaking-sessions (filtered for student)

Speaking Session Detail — /student/speaking/[id]

- Session info, topic, other participants
- After session: AI feedback, scores, areas to improve
- Rating form
- API: GET /api/speaking-sessions/[id], POST .../rate

Grammar Hub — /student/grammar

- 16 category cards with progress rings

- Overall progress stats
- API: GET /api/grammar/categories

Grammar Category — /student/grammar/[categorySlug]

- Topic list for category with completion status
- API: GET /api/grammar/topics?category=xxx

Grammar Topic — /student/grammar/[categorySlug]/[topicSlug]

- 3 tabs: Learn (lesson content), Practice (interactive exercises), Quiz (timed assessment)
- API: GET /api/grammar/topics/[id], POST /api/grammar/exercises/check, GET/POST /api/grammar/quiz/[topicId]

Homework — /student/homework

- Pending + completed homework list
- Each homework shows: title, due date, sections, submit button
- API: Server-side Prisma query

Progress — /student/progress

- Speaking progress: participation trends, vocabulary growth, grammar timeline
- Grammar progress: per-category completion
- API: GET /api/progress/[studentId], GET /api/grammar/progress

Classes — /student/classes

- Enrolled classes with schedule
- API: GET /api/student/classes

Lessons — /student/lessons

- Past lessons with notes
- API: GET /api/student/lessons

Payments — /student/payments

- Current plan info, next due date
- Transaction history with status
- Submit payment proof (screenshot upload for IBAN)
- API: GET /api/student/payments, POST /api/payments/transactions

Attendance — /student/attendance

- Attendance record
- API: Server-side query

5. Onboarding Wizards

Student Onboarding — /onboarding/student

6 steps:

1. Personal Info (name, country, timezone, phone)
2. Track Selection (Speaking Only vs Full Student)
3. Level Assessment (A1/A2/B1/B2/C1/C2 self-select)
4. Availability Grid (7 days × 3 time slots)
5. Topic Preferences (12 categories to pick from)
6. International Mixing (prefer mixed nationalities yes/no)

API: POST /api/onboarding

Teacher Onboarding — /onboarding/teacher

3 steps:

1. Personal Info (timezone, country)
2. Specializations (TOEFL, IELTS, Grammar, Speaking, Business, etc.)
3. Bio textarea

API: POST /api/onboarding

6. Shared Components

Component	Used In	Description
Sidebar	Admin, Teacher, Student	Role-based navigation
Notification Bell	All portals	Dropdown with unread count, mark as read
Badge	Everywhere	Status indicators (success/warning/danger/info/outline)
Button	Everywhere	Variants: default (blue), outline, ghost, destructive
Card	Dashboards	Stats display
Table	List pages	Sortable data tables
Modal/Drawer	Create forms	Overlay forms
Chat Bubbles	WhatsApp, AI Chat	Message display
Progress Ring	Grammar	Circular progress indicator
Date Picker	Sessions, Payments	Date selection

Design Notes

1. **Color Scheme:** Blue primary (#2563EB), tailwind gray scale
2. **Font:** System font stack (monospace not needed)
3. **Layout:** Sidebar (240px) + Main content area
4. **Responsive:** Mobile-first, sidebar collapses to hamburger on mobile
5. **Dark Mode:** Not implemented yet (future consideration)
6. **Language:** UI in English, content supports English + Turkish
7. **Auth Flow:** Login → Role-based redirect → Portal dashboard
