
English Homework: Session with Ahmet

Student: Ahmet
Date: March 2, 2026
Estimated Time: 1 hour
Next Lesson: Tuesday

Introduction

Hi Ahmet,

✓
This was a **fantastic** first lesson back! It was great to hear about your life. Your English has improved so much—your fluency, confidence, and vocabulary were all on point. Let's keep that momentum going with this homework, which is based on the things we talked about.

1 Part 1: Vocabulary in Context (20 minutes)

In our conversation, we used some great words and phrases. Let's practice them.

Instructions: Write one original sentence for each of the following words or phrases from our talk. The sentences should be about your work, your hobbies (like your Lego project), or your daily life (like cooking or fasting during Ramadan).

Vocabulary Words

1. **To manage** (as in "I have to manage all things about my life")

Since my wife went to the USA two months ago I have been managing all housework myself.

2. **To be into (something)** (as in "I am not into music")

I was into playing tennis. However my left knee was got injured in 2020. Because of this I'm into watching tennis match on TV.

😊

3. To be on fire (idiom, as in "you were on fire today")

Whenever I work on a challenging project, I feel ^{that} like I'm on fire. I'm keen on working on engineering problems.

4. A complex problem (as in "a really complex problem")

They arrange for me to solve a complex problem.

5. To launch / To attack (as in "US and Israel launched to attack Iran")

Iran launched to save the community includes children against the Israel attacks.

2 Part 2: Summarize Your Week (20 minutes)

I'd like you to practice writing about your week.

Instructions: Write a short paragraph (5-7 sentences) summarizing your past week. Try to include the following details:

- How you are managing the house.
- What you ate for iftar or suhur this week (especially that soup you learned to cook!).
- Your work on the new project or your other consultancy work.
- Your new hobby—the Lego/puzzle lamp you showed me (it looked amazing!).

I launched to manage a consultancy work in Istanbul past week. I traveled from Ankara to Istanbul by speed train. I like it very much. When I was travelling by train I felt more comfortable and relax than driving all day. I was at site at midnight for two days. After I went back my home I've continued making puzzle lamp to relax. I cooked Tarhana soup for dinner. It was a little bit watery but delicious. I drank only two glass of water 2 for suhur.

3 Part 3: Prepare for Our Next Class (20 minutes)

In our next class, I want to dive deeper into the **pavement project** we discussed. You were so knowledgeable and passionate when talking about this—it was great to see!

Instructions: Please answer the following questions in a few sentences each. This will help you prepare to talk about the project more fluently. Don't worry about perfect grammar—just focus on expressing your ideas clearly.

1. You told me about a new project. Can you explain it again in a few sentences? What is the goal of the project?

Skid resistance between the car's wheel and the road surface is really important to save drive. Under heavy traffic and whether condition skid resistance decrease in time. So the road surface needs some rehabilitation application to increase it again.. to prevent the accidents. We have been working on this project to improve the innovative technics. The solution have to be not only cost effective but also effective one by using local materials and equipments.

2. We talked about "surface dressing" (which you called "Sathi Kaplama" in Turkish). Can you explain what this type of road surface is and why it is used so much in Turkey? Imagine you are explaining it to someone who knows nothing about roads—like me!

Surface dressing is one of the pavement type for low traffic roads. Typical structure of surface dressing pavement is apply prime coat (24/m²) on compacted base. After curing of prime coat, bitumen and aggregate is applied by special equipments. It is possible to make two layer surface dressing on base. It is more cheaper than asphalt concrete pavement type. However the roughness Index is too high to drive in comfortable.

3. You mentioned that Turkey needs a pavement management system for these surface dressing roads. Why do you think it's important? What could a good system help the govern-

ment or engineers to do?

General Directorate of Turkish Highways is responsible more than 64.000 km_{roads} to project, construct and maintenance. KGM spends

30% of the investment budget of Turkey and they use half of this budget for road pavement. Because of lacking of budget KGM has to construct surface dressing application for low traffic roads, length of 33.000 km. In my point of view they have to create a Pavement Management System of surface dressing roads to use the budget very efficient. The question is which roads need to renovate and maintenance priority.

By Using PMS for surface dressing road pavement, you can easily determine which road needs preservation first, which method you use and what the correct time to construct is.

Bonus Vocabulary: 20 Advanced Words & Synonyms

Here are 20 advanced words from our conversation with synonyms to help you express yourself better. Try to use 2-3 of these in our next class!

#	Word	Synonyms
1	To manage	To handle, <u>to cope with</u> , to organize
2	Fluency	<u>Command</u> , <u>proficiency</u> , <u>articulateness</u>
3	To focus (on)	To concentrate on, <u>to hone in on</u>
4	Capacity	<u>Capability</u> , <u>output</u> , potential
5	To evaluate	<u>To assess</u> , <u>to analyze</u> , <u>to appraise</u>
6	Commercial	<u>Business-related</u> , economic, <u>marketable</u>
7	Consultancy	<u>Advisory</u> , <u>consulting</u> , expert advice
8	To detect	<u>To identify</u> , to spot, <u>to recognize</u>
9	Distress	<u>Damage</u> , <u>deterioration</u> , wear and tear
